<b>Office Action Summary</b>	<b>Application No.</b> 10/541,673	<b>Applicant(s)</b> CHASSAIN, CHRISTOPHE	
	<b>Examiner</b> MICHAEL J. BOOTH	<b>Art Unit</b> 3774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claims 27-52 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagai US 2001/0004708.***

***With respect to the claims,*** see figures by Nagai, specifically to figure 1a, whereby a capsular tension ring is show, adapted to be implanted. The sizes in the claim limitations majority use the term "about", whereby broadly interpreted, further where the device by Nagai is inherently sized appropriately to meet the application (e.g. where it is being implanted, human vs animal, etc.). Further, Nagai discloses use of a rigid material, such as PMMA **P56**. The eyelet or hole in the ring present as seen from the figures.

FIG. 1(a)

**Figure 1(a) of Nagai**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Art Unit: 3774

2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

***Claims 27-52 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nagai US 2001/0004708.***

***With respect to the claims;*** as discussed supra, further with elaboration to the sizes of the implant. Alternatively, it would have been obvious to one of ordinary skill in the art at the time the invention was made to optimize the device to fit that of the subject. Furthermore, it is well within the technical skill in the art to make the implant sized and shaped to fit the subject, where it may be desirable.
